

Return your old battery
Gift a child
a new life

EXIDE

in association with

unicef 

When you return a used battery to any of our authorised dealers, we contribute on your behalf, to UNICEF's Child Environment Programme.

It would help change the lives of the underprivileged children who are in dire need of water, sanitation and hygiene in schools. Your contribution would help save our environment as well. Lead, a major component in your car battery, if not handled responsibly, can harm the environment and our health.

Return your used car battery and make the world a better place.

Whenever, wherever your car battery
is in trouble, we'll be there.

Just dial the Bat Mobile number
and we'll be right there to bring your car back
to life. Because, we love cars!

**INDIA'S ONLY
ALL TERRAIN BATTERY**

4 - YEAR WARRANTY*

Contrary to popular belief, the hood of your car is not good enough protection for the car battery! Extreme temperatures, frequent starts and stops and rough terrain take a toll on your car, contributing to the premature failure of the battery through depletion of active material.

What makes Exide ATB unbelievably tough?

Exide ATB comes with Double Clad protection. Special profile polyethylene envelopes protect the negative plates and Glass Mats protect the positive plates. This unique feature provides several benefits:

- It combats corrosion
- The double protection makes the battery tough enough to counter the usual wear and tear that cars experience on Indian roads
- It equips the battery to perform consistently in any condition and on all kinds of terrain

All the above taken together make the Exide ATB an incredibly tough battery.
